Agenda - curious questions

1

What are the key 21st-century skills our students need to thrive in today's changing world?

2

Why do we need 21st century skills?

3

What can we learn from international education systems efforts to infuse 21st Century Skills?

4

What does this mean for the GEC? How do we infuse 21st-Century Skills into the GEC?

Why curious questions?

Curiosity is the driver of attention and engagement. Getting and keeping learners curious is one of the key factors of successful education.

S. Gravett 2022

Science of learning: Attention and engagement

**What are the 21st-
Century Skills we
need to thrive in
changing world ?**

21st Century Skills

21st-Century Skills refer to key abilities that learners need to grow in order to succeed and thrive in today's fast-paced world.

Known by many names such as transferable skills, soft skills, competencies, essential skills, life skills, future skills, higher-order thinking skills...

Ask the audience

**What do you
think are
important 21st-
Century Skills?**

*Science of learning: Assessing prior
knowledge*

Examples of 21st-Century Skills

Summary 21st-century leaders and learners

21st-century learners, teachers, and leaders are people who employ skills such as critical thinking, collaboration, creativity **to be**

problem-finders and solution-seekers

who are **self-directed** as they look for opportunities to **solve problems** and create **value for everyone!**

**Why do we
need 21st-
Century
Skills?**

Ask the audience

Why do we need 21st-Century Skills?

*Science of learning: opportunities for
deep thinking*

We live in a changing world...

Population: 4 billion
1980's

Population: 7 billion
2010's

... where change is rapid

A recent controlled study found that ChatGPT can help professionals increase their efficiency in routine tasks by ~35%. If we keep in mind that the productivity gains brought by the steam engine in the nineteenth century was ~25%, this is *huge*.

*Quote from Dr. Philippa Hardman
Learning Research Digest*

Moore's law: computing power doubling every 18 months.

... and the future is uncertain

Our future is

- **Volatile**
- **Uncertain**
- **Complex**
- **Ambiguous**

Images were taken from Pexels

Can perpetuate inequality

...If we do not embrace these changes and prepare our young people with the skills they need for a rapidly changing world.

These skills are INTERCONNECTED. These 21st Century Skills also help the development of academic skills.

**What can we learn
from international
education systems'
efforts to infuse 21st
Century Skills?**

What can we learn from the learning sciences?

What is the science of learning?

A multidisciplinary field combining cognitive science, educational psychology, neuroscience, and pedagogy. Its goal is to enhance our understanding of learning processes to improve educational methods and outcomes. (This is NOT new)

What does it tell us about 21st-Century Skills?

Collaboration
Communication
Critical thinking
Creativity
Cognition/Metacognition/
Confidence

AND
Content (CAPS)

Are key to learners' success

What do the researchers say?

We've identified [through the learning sciences] the 6C's that will help all young people to become thinkers... contributing members of their communities as they forge a fulfilling life.

(Hirsch-Pasek Golinkoff, 2016, p5.)

Seven
General
Capabilities

Learning from others

This collection of case studies has been developed to synthesise key insights and learnings across a sample of exemplary countries to inform ongoing education improvement in South Africa.

Country Case Studies

Learning from others

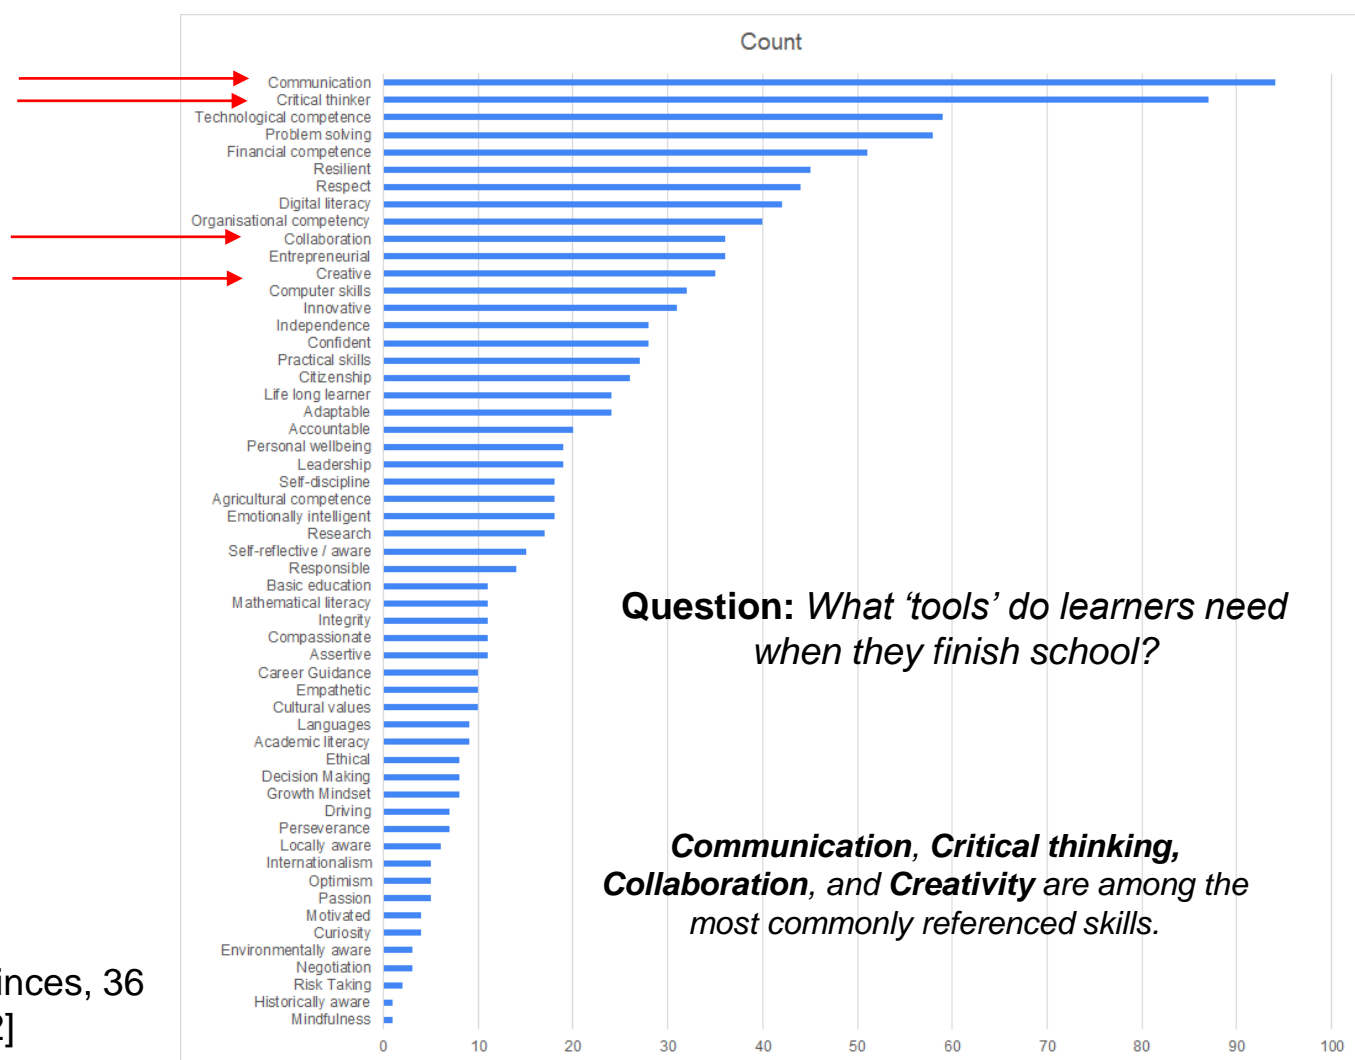

- Different frameworks have different purposes for different settings.
- Each framework adds to the conversation.
- No single framework can be used to solve every problem and meet every need.
- There is no ONE way to infuse competencies, different countries have done different things.
- Teaching and developing 21st-Century Skills requires alignment between assessment, curriculum and teacher development.
- The measurement of 21st -Century Skills is still in its infancy and does not lend itself to summative methods of assessment. (Care et al 2018)
- It is NOT a quick fix, it is a developmental process with a number of steps, taking place over time.

South African stakeholder engagement led by Curriculum Strengthening

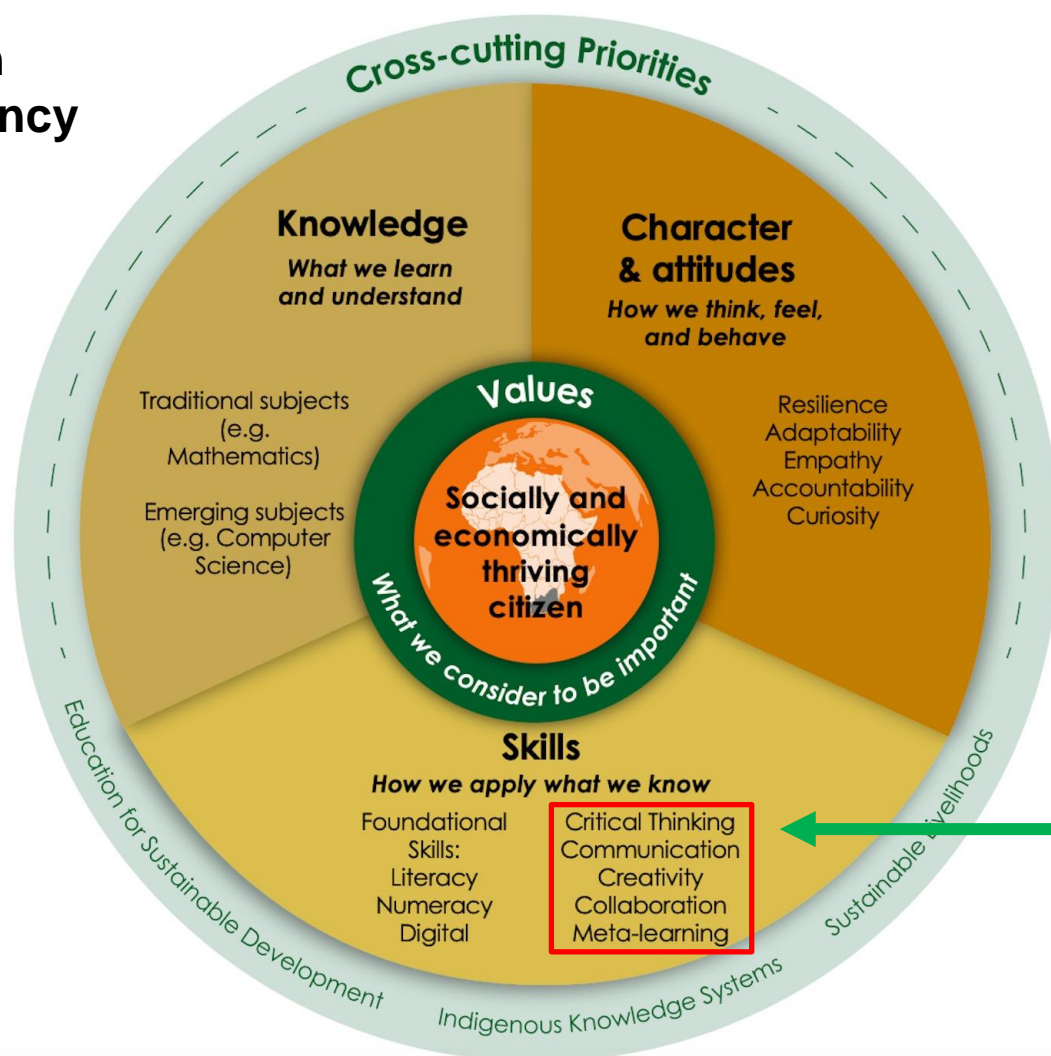

Consulted with

- Adults(**314**)
- Learners(**117**)
- Virtual participants (**60**)

Workshops – across 9 provinces, 36 workshops [Sep to Nov 2022]

A possible South African Competency Framework

The five C's are very prominent in this framework!

**What does this
mean for the
GEC? How do we
infuse 21st-
Century Skills
into the GEC?**

Process

Framework comparison

Analyzed two international frameworks, the CCR Rubric, and the ACER framework, to check for overlap and differences. Chosen for their deep research, coherence, and relevance

Skills mapping

Linked key elements from these frameworks to the learning process of integrated projects (13 steps). What types of activities support the practice of 21st-Century Skills, because these skills are cultivated through pedagogies that support deep learning

Sub-skill selection

Selected a limited set of sub-skills from ACER and CCR to create a manageable framework, that are practically observable.

Rubric testing

Tested and updated the rubric based on findings.

Skill infusion

Purposefully embedded 21st-Century Skills into Integrated Projects (2023).

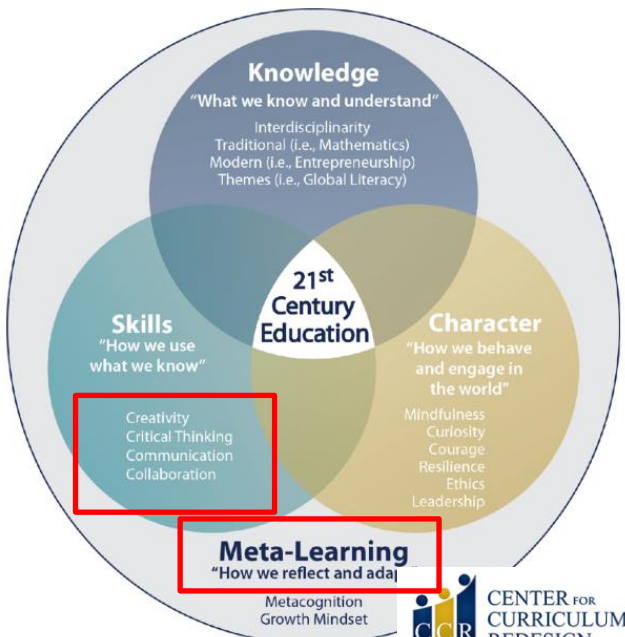

Updates from 2022

Challenges	Mitigation
Limited training and additional support resources	½ day training Teachers guide to 21st-Century Skills 21st-Century Skills toolkit
Too many criteria	Reducing measurement criteria from 25 - 15.
Lack of integration of 21st-Century Skills into the projects	Integrated 21st-Century Skills into projects
Vague reporting process	Refining the data collection process for 21st-Century Skills.

Testing and learning, from global to local

- Critical thinking
- Collaboration
- Creative thinking

Drawing on a couple of well-researched evidenced based and relevant frameworks

The CCR Four-Dimensional Framework Source: CCR

 **CENTER FOR CURRICULUM REDESIGN**
Making Education More Relevant

ACER Framework example Critical Thinking

	Strand	Aspect
CRITICAL THINKING <i>Critical thinkers ask questions, find the right information, and apply it to solve a problem</i>	Strand 1 Knowledge construction	Aspect 1.1 Identifies gaps in knowledge
		Aspect 1.2 Discriminates amongst information
		Aspect 1.3 Identifies patterns and makes connections
	Strand 2 Evaluating reasoning	Aspect 2.1 Applies logic
		Aspect 2.2 Identifies assumptions and motivations
		Aspect 2.3 Justifies arguments
	Strand 3 Decision-making	Aspect 3.1 Identifies criteria for decision-making
		Aspect 3.2 Evaluates options
		Aspect 3.3 Tests and monitors implementation

CCR Framework Example Critical Thinking

2	CRITICAL THINKING	
no.	Sub-competency ongoing parts that make up the competencies	Elements describe the behaviours indicative of each proficiency level
2.1.	Analysing Identifying, clarifying, and organizing information	Hierarchy of information
		Questions
		Research
		Ambiguity
		Visual
2.2.	Considering alternatives	Assessing the source of opinions
	Considering opposing points of view	Seeking out Alternatives
		Judging opinions
2.3.	Reasoning	Identifying and Evaluating Reasoning
		Connecting Information and Arguments
2.4.	Critically reflecting	Justifying Decisions and Behavior
	Reflecting critically	Reflecting on actions
		Learning from experiences

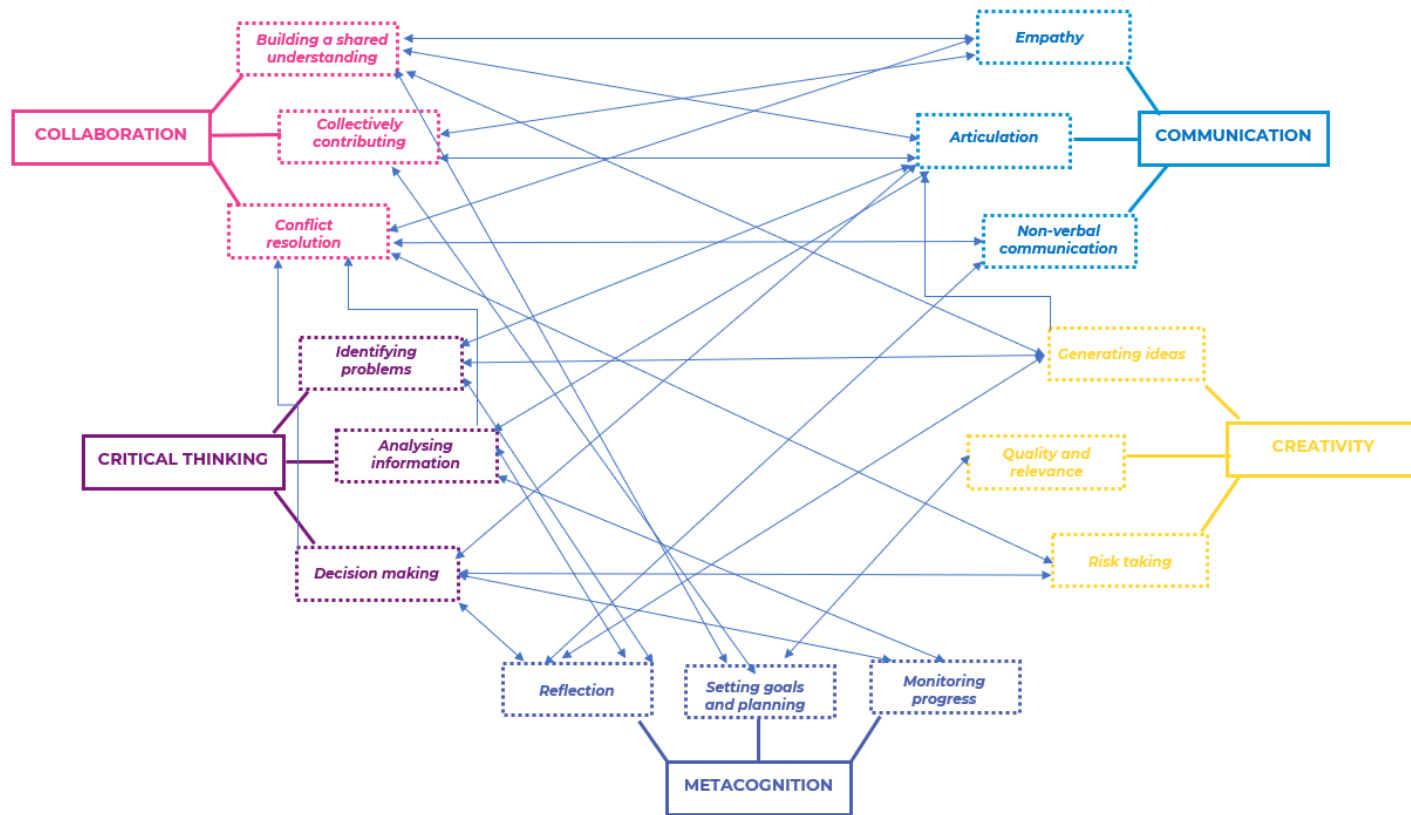

Scoring Rubric 21 st Century Skills (5Cs)							
1. Critical thinking: <i>(Critical thinkers ask questions, find the right information, and apply it to solve a problem)</i>	SS (Project 1)			Math (Project 2)			Total
	1.1 Able to define a problem (How did apartheid laws influence business and career opportunities?)	Y	N	1.1 Able to define a problem (How do we calculate resistance in a current?)	Y	N	/10
	1.2 Able to investigate information/do research	Y	N	1.2 Able to investigate information/research formulas	Y	N	
	1.3 Knows how to select information	Y	N	1.3 Knows how to select Information/choose formula	Y	N

GEC 21st-Century Skills Rubric

21st Century Skills	Descriptor
Critical thinking Critical thinkers ask questions, find the right information, and apply it to solve a problem	1.1 Asking questions: The learner asks appropriate questions to find out more information?
	1.2 Evaluating ideas: The learner identifies which information was helpful to solve the problem.
	1.3 Identifying patterns: The learner uses tools (e.g. mind maps and diagrams) to help organise his/her information.
Communication Communication is the process of sharing information, attitudes and values. Both "what we say" (verbal communication) and "how we say it" (non-verbal communication) are important)a problem	2.1 Non-verbal communicationL The learner recognises nonverbal cues such as tone of voice and expression.
	2.2 Articulation: The learner uses the correct language for the situation.
	2.3 Empathising: The learner tries to understand how others were feeling.
Creativity Creative thinking is defined as the ability to come up with many different ideas and apply them to find realistic solutions to problems. There are two important aspects to creative thinking: Originality and usefulness	3.1 Number of ideas: The learner comes up with many ideas.
	3.2 Range of ideas: The learner thinks of a range of different ideas.
	3.3 Feasibility of ideas: These ideas were realistically possible to implement as solutions to the problem.
Collaboration Collaboration is when two or more people work together to solve a problem. Interdependence is achieved when group members share responsibility and pool their information and resources to develop a shared understanding of the problem and their solution to it.	4.1 Negotiating roles and responsibilities: The learner negotiates and decide on the role he/she would play in the group.
	4.2 Pooling resources: The learner shares his/her own knowledge and experiences with the group to help strengthen the project.
	4.3 Engaging with roles and responsibilities: The learner completes and submit the required tasks for the group.
Metacognition Meta-learning is about being aware of how we think, what we know and how we know it. Metacognition helps us to reflect on our thinking, set goals, and monitor and evaluate our learning.	5.1 Setting goals and planning: The learner set goals and make a plan during the project.
	5.2 Monitoring progress against plans: The learner monitors their progress against their plans
	5.3 Reflecting on planned work: The learner reflects on their project and or their prior knowledge.

REPUBLIC OF SOUTH AFRICA

GEC 21st-Century Skills Rubric

CRITICAL THINKING

Critical thinkers ask questions, find the right information, and apply it to solve a problem

COMMUNICATION

Communication is the process of sharing information, attitudes and values. Both “what we say” (verbal communication) and “how we say it” (non-verbal communication) are important

CREATIVITY

Creative thinking is defined as the ability to come up with many different ideas and apply them to find realistic solutions to problems. There are two important aspects to creative thinking: Originality and usefulness

COLLABORATION

Collaboration is when two or more people work together to solve a problem.
Interdependence is achieved when group members share responsibility and pool their information and resources to develop a shared understanding of the problem and their solution to it.

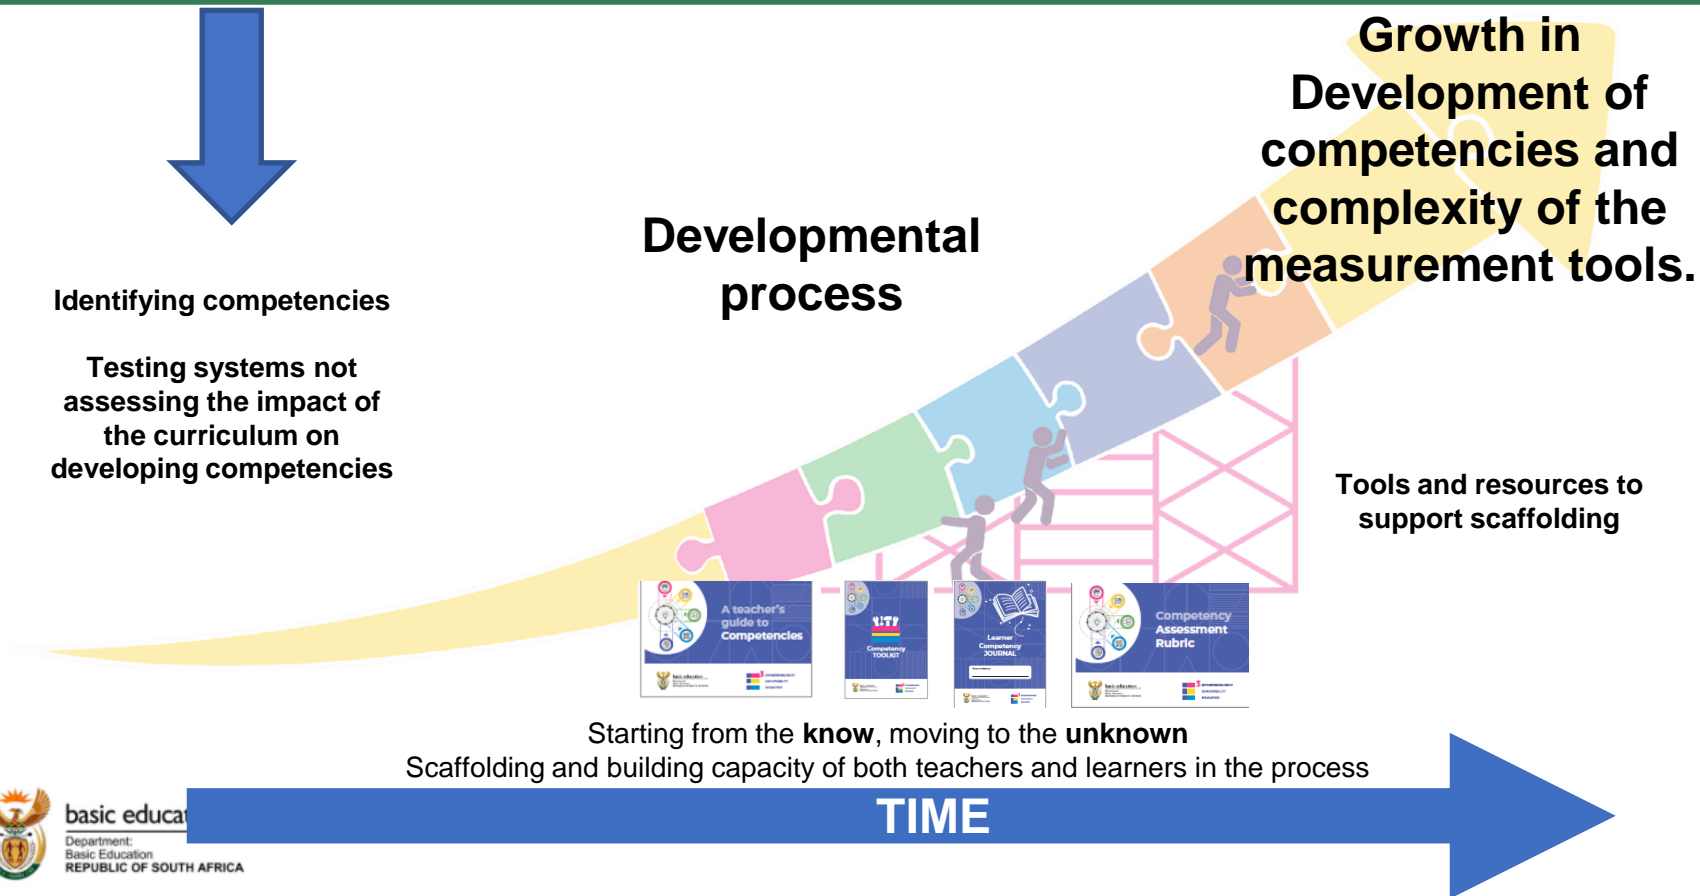

METACOGNITION

Meta-learning is about being aware of how we think, what we know and how we know it. Metacognition helps us to reflect on our thinking, set goals, and monitor and evaluate our learning.

GEC 21st-Century Skills Rubric

CRITICAL THINKING	COMMUNICATION	CREATIVITY	COLLABORATION	METACOGNITION
1.1 Asking Questions 1.2 Evaluating ideas 1.3 Identifying patterns	2.1 Non-verbal communication 2.2 Articulation (how we say things) 2.3 Empathising	3.1 Number of ideas 3.2 Range of ideas 3.3 Feasibility of ideas	4.1 Negotiating roles and responsibilities 4.2 Pooling resources 4.3 Engaging with roles and responsibilities	5.1 Setting goals and planning 5.2 Monitoring progress against plans 5.3 Reflecting on work

A journey towards complexity

Research to inform practice

Looking at questions such as:

- How effective do teachers find the rubric in observing 21st century skills among learners?
- What challenges do teachers encounter when implementing the rubric in their classrooms?
- How easily can teachers incorporate this rubric into their existing teaching practices?
- How do teachers interpret the rubric? Is it too granular, or too simplistic?
- Do current teaching practices give teachers enough opportunities to see learners practice their 21st-Century skills?
- What teacher training is needed?
- What changes to the curriculum need to take place to support this, if any?

Informing the Curriculum Strengthening process of developing a South African Competency Framework

What next?

A journey towards the development of

- Ensuring clear definitions and descriptions of 21st-Century Skills
- Clear developmental trajectories for 21st-Century Skills
- Focus on formative assessment methods
- Implementation of a teaching-for-learning approach that support the development of 21st Century Skills
- Prioritising learner reflection

The 7 Habits of Highly Effective People

1. Be Proactive

2. Begin with the End in Mind

3. Put First Things First

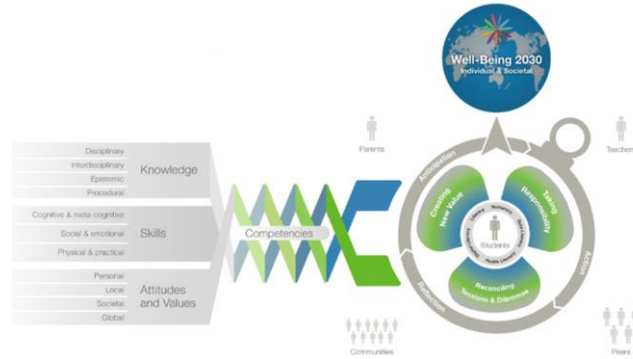

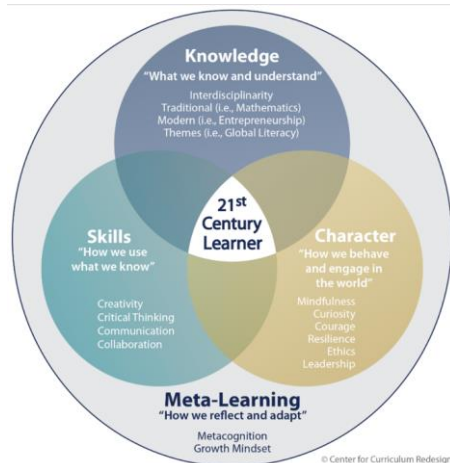

4. Think Win-Win

5. Seek First to Understand, Then to Be Understood

6. Synergize

7. Sharpen the Saw

The diagram is a circular model representing the components of SEL Instruction & Classroom Climate. At the center is a white circle labeled "Social & Emotional Learning". Surrounding this center are four colored segments: orange (Self-Awareness, Self-Management), yellow (Responsible Decision-Making, Relationship Skills), green (Social Awareness), and light green (SEL Instruction & Classroom Climate). The outer ring is blue and contains the text: "COMMUNITIES", "FAMILIES & CAREGIVERS", "SCHOOLS", "CLASSROOMS", "Authentic Partnerships", "Aligned Learning Opportunities", and "Schoolwide Culture, Practices & Policies".

The diagram illustrates the Framework for 21st Century Learning. At the top, a semi-circular arch is composed of four colored segments, each representing a skill area: Life and Career Skills (red), Learning and Innovation Skills (orange), Core Subjects and 21st Century Themes (green), and Information, Media, and Technology Skills (purple). Below this arch, four concentric circles represent the foundational layers of the framework, labeled from top to bottom: Standards and Assessments, Curriculum and Instruction, Professional Development, and Learning Environments.

GEC 21st-Century Skills Rubric

21st Century Skills	Descriptor
Critical thinking Critical thinkers ask questions, find the right information, and apply it to solve a problem	1.1 Asking questions: The learner asks appropriate questions to find out more information?
	1.2 Evaluating ideas: The learner identifies which information was helpful to solve the problem.
	1.3 Identifying patterns: The learner uses tools (e.g. mind maps and diagrams) to help organise his/her information.
Communication Communication is the process of sharing information, attitudes and values. Both "what we say" (verbal communication) and "how we say it" (non-verbal communication) are important)a problem	2.1 Non-verbal communicationL The learner recognises nonverbal cues such as tone of voice and expression.
	2.2 Articulation: The learner uses the correct language for the situation.
	2.3 Empathising: The learner tries to understand how others were feeling.
Creativity Creative thinking is defined as the ability to come up with many different ideas and apply them to find realistic solutions to problems. There are two important aspects to creative thinking: Originality and usefulness	3.1 Number of ideas: The learner comes up with many ideas.
	3.2 Range of ideas: The learner thinks of a range of different ideas.
	3.3 Feasibility of ideas: These ideas were realistically possible to implement as solutions to the problem.
Collaboration Collaboration is when two or more people work together to solve a problem. Interdependence is achieved when group members share responsibility and pool their information and resources to develop a shared understanding of the problem and their solution to it.	4.1 Negotiating roles and responsibilities: The learner negotiates and decide on the role he/she would play in the group.
	4.2 Pooling resources: The learner shares his/her own knowledge and experiences with the group to help strengthen the project.
	4.3 Engaging with roles and responsibilities: The learner completes and submit the required tasks for the group.
Metacognition Meta-learning is about being aware of how we think, what we know and how we know it. Metacognition helps us to reflect on our thinking, set goals, and monitor and evaluate our learning.	5.1 Setting goals and planning: The learner set goals and make a plan during the project.
	5.2 Monitoring progress against plans: The learner monitors their progress against their plans
	5.3 Reflecting on planned work: The learner reflects on their project and or their prior knowledge.

1.1 Asking Questions 1.2 Evaluating ideas 1.3 Identifying patterns	2.1 Non-verbal communication 2.2 Articulation (how we say things) 2.3 Empathising	3.1 Number of ideas 3.2 Range of ideas 3.3 Feasibility of ideas	4.1 Negotiating roles and responsibilities 4.2 Pooling resources 4.3 Engaging with roles and responsibilities	5.1 Setting goals and planning 5.2 Monitoring progress against plans 5.3 Reflecting on work

A journey towards complexity

Research to inform practice

Looking at questions such as:

- How effective do teachers find the rubric in observing 21st century skills among learners?
- What challenges do teachers encounter when implementing the rubric in their classrooms?
- How easily can teachers incorporate this rubric into their existing teaching practices?
- How do teachers interpret the rubric? Is it too granular, or too simplistic?
- Do current teaching practices give teachers enough opportunities to see learners practice their 21st-Century skills?
- What teacher training is needed?
- What changes to the curriculum need to take place to support this, if any?

Informing the Curriculum Strengthening process of developing a South African Competency Framework
